SETUP INSTRUCTIONS

AI-generated - specific to this project

1

Navigate to project folder

\$ cd C:\Users\HP\autodev-projects\notes_maker

Make sure you are in the project root directory.

2

Set up backend dependencies

\$ pip install -r notes_maker\requirements.txt

This will install all necessary Python packages for the FastAPI backend.

3

Copy environment variables

\$ copy .env.example .env

Don't forget to fill in the values in the .env file.

4

Initialize the database

\$ python notes_maker\database\seed.py

This will set up the initial database with any required data.

5

Run the FastAPI backend

\$ uvicorn notes_maker.main:app --reload

This starts the FastAPI server in development mode.

6

Set up frontend dependencies

\$ npm install

This installs all necessary JavaScript packages for the React frontend.

7

Run the React frontend

\$ npm run dev

This starts the Vite development server for the React application.

8

Alternative: Run with Docker

\$ docker-compose up --build

If you have a Dockerfile, this command will build and run the application in a container.

9

Run tests

\$ pytest

This will execute any tests located in the tests/ folder.

Info

▲ Hide Details

WARNING

Test targets 'DELETE /notes/999' but no matching backend route found

💡 Remove or update test for 'DELETE /notes/999', or add the missing backend route

WARNING

Test targets 'PUT /notes/999' but no matching backend route found

💡 Remove or update test for 'PUT /notes/999', or add the missing backend route

WARNING

Model 'Note' defined in multiple files: ['database/models.py', 'notes_maker/database/models.py']

💡 Keep 'Note' only in database/models.py and import it everywhere else

INFO

README documents 'GET /notes*:*' but no matching backend route found

💡 Update README to remove undocumented/non-existent route

INFO

README documents 'POST /notes*:*' but no matching backend route found

💡 Update README to remove undocumented/non-existent route

INFO

README documents 'DELETE /notes/{id}*:*' but no matching backend route found

💡 Update README to remove undocumented/non-existent route

INFO

README documents 'PUT /notes/{id}*:*' but no matching backend route found

💡 Update README to remove undocumented/non-existent route

INFO

Backend route 'GET /notes' is not documented in README

💡 Add this endpoint to the README API section

INFO

Backend route 'POST /notes' is not documented in README

💡 Add this endpoint to the README API section

INFO

Backend route 'PUT /notes/{id}' is not documented in README

💡 Add this endpoint to the README API section

INFO

Backend route 'GET /' is not documented in README

💡 Add this endpoint to the README API section

INFO

Backend route 'DELETE /notes/{id}' is not documented in README

💡 Add this endpoint to the README API section
